### About Raven

Raven is a world leader in the design and manufacture of satellite antenna equipment used for both direct to home (DTH) and two-way (VSAT) applications worldwide.

Raven's in house design capability allows rapid turn around of complex antenna and feed designs. This combined with world class design technology provides novel and cost effective design solutions to satisfy the needs of the most discerning end customers.

Manufacturing in both the US and UK, with manufacturing partners in Asia and the Far East, Raven can offer customers product from a variety of shipping points reducing transport costs and minimising stock holding.
